MELSHETTY-PES2UG23CS160

PROJECT TITLE:

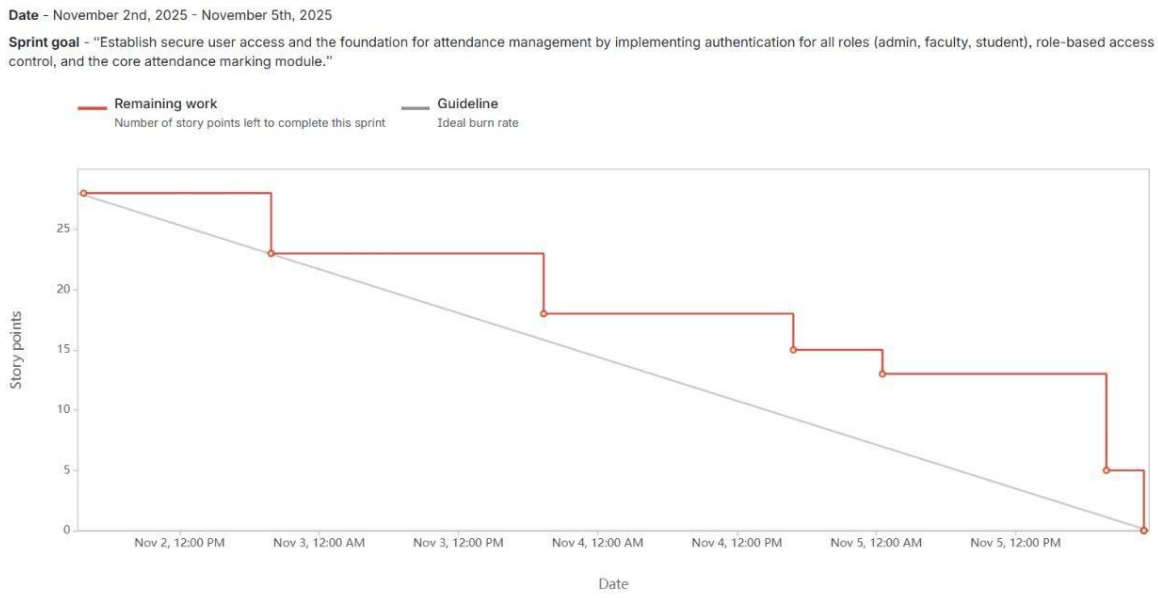
SE PROJECT_2025

Student attendance management system - An app like the app we have at PESU

DELIVERABLES:

1)BURNDOWN CHART:

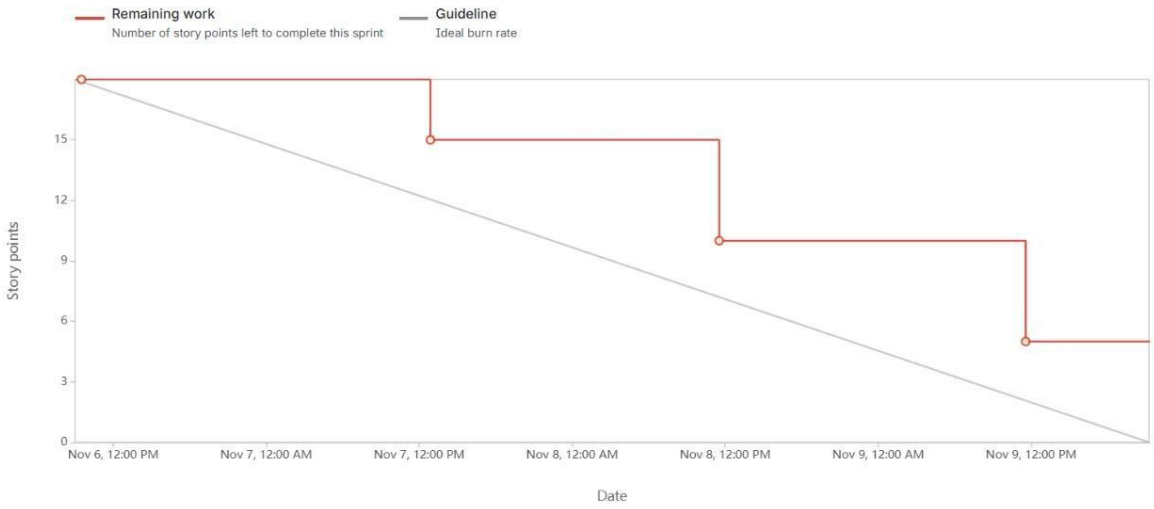
SPRINT1:



SPRINT2:

Date - November 6th, 2025 - November 9th, 2025

Sprint goal - enable the student to edit the attendance,view the attendance percentages,allow admin to generate the list of students less than 75 percent



RETROSPECTIVE :

SPRINT1:

Retrospective: SAMSS Sprint 1

Reflect on past work and identify opportunities for improvement by following the instructions for the Retrospective Play.

Overview

Date	Nov 5, 2025
Team	Student Attendance Management System
Participants	@Deesha @Daneshwari Melshetty @CHANDANA LAKYA @chitra madarakhandi

Retrospective

Start doing		**Stop doing**		**Keep doing**	
Theme	Details	Theme	Details	Theme	Details
Biometric Simulation Testing	Begin testing biometric login flow using simulated fingerprint or OTP verification to ensure multi-auth works across browsers.	**Manual Credential Verification**	Stop testing login by manually editing DB records — use the UI and test data sets instead.	**Secure Password Storage**	Continue using `bcrypt` for hashing and `.env` for secret management.

Role-based Unit Tests	Write automated tests validating that only authorized roles access respective dashboards.	**Skipping Edge-Case Scenarios**	Don't ignore retry/lockout conditions when failed login attempts reach threshold.	**Clear UI Flows**	Keep the streamlined login form and success feedback messages.
Error-state Handling	Add clear messages for locked accounts, missing biometric device, or invalid credentials.			**Collaboration Between Roles**	Maintain coordination between backend (dev team) and UI (testers) to verify both student and faculty logins.

Pro tip: You can also run a retro on a Confluence whiteboard by typing /retro

✅ Action items

ID	Item	Owner
A1	Add biometric (fingerprint/OTP) mock module for faculty login	Backend Dev

A2	Write automated login tests for both roles	QA Team
A3	Document user account creation and approval flow in README	Tech Writer
A4	Verify login UI responsiveness on mobile devices	Frontend Dev

SPRINT2:

Retrospective: SAMSS Sprint 2

Reflect on past work and identify opportunities for improvement by following the instructions for the Retrospective Play.

Overview

Date	Nov 9, 2025
Team	visionsoft
Participants	@CHANDANA LAKYA @Deesha @Daneshwari Melshetty @chitra madarakhandi

Retrospective

Start doing	Stop doing	Keep doing	
1. Implement detailed **audit logs** for every attendance edit to track who made changes and when. 2. Provide **visual attendance analytics dashboards** for faculty/admin to quickly identify trends.	1. Relying on **manual attendance calculations**, which are error-prone. 2. Ignoring **auditability and compliance** for edits—every change should be traceable. 3. Creating **static reports** that are not	• • Keeping **real-time attendance updates** so the data is always current. • Using a **centralized database** for storing attendance data securely. • Maintaining **separate**	•

3. Include **automated defaulter list generation** for students with <75% attendance. 4. Allow students to **view attendance percentages per subject** in a clean and user-friendly interface. 5. Use **role-based access control** to ensure only authorized users can edit or view sensitive data.	actionable or easily exportable. 4. Overcomplicating UI for students or faculty; unnecessary features that clutter dashboards.	**views for students, faculty, and admin** based on user roles. • Ensuring **secure login and authentication** mechanisms. • Regularly **testing new features** to ensure accuracy and usability. •	

Pro tip: You can also run a retro on a Confluence whiteboard by typing /retro

Action items

- Implement **audit log module** for all attendance edits.
- Design **attendance percentage view per subject** for students.
- Develop **defaulter list automation** (<75% attendance).
- Build **interactive attendance analytics dashboard** for faculty/admin.
- Set up **role-based access and permissions** for different user types.
